

# Dylan Hughes

## CREATIVE TECHNOLOGIST AND DEVELOPER

Richmond, VA | dyl.harrell@gmail.com | dylanhughes.dev | github.com/d1elon

Creative technologist and developer who takes projects from design through implementation. Builds business websites, interactive software and workflow automation, combining development with digital media, hardware integration and fabrication.

## EXPERIENCE

### Freelance Technical Consultant and Developer

Self-employed | Richmond, VA | 2025–Present

- Design, build and launch small-business websites, with five projects delivered to local clients.
- Create service-focused content, configure local SEO and Google Business Profiles, and provide ongoing website maintenance under retainer.

### Digital Content Specialist & Personal Assistant

Alex Glaser / The Glaser Group | Richmond, VA | Jul 2023–Present

- Improve workflows for a multi-business owner, automate recurring work and introduce AI tools for daily productivity; coordinate clients, scheduling, travel and purchasing.
- Develop original game software in C# and Unity and customize interactive experiences across Multimorphic P3, Stern Spike 2 and Stern SAM platforms.
- Produce and integrate game interfaces, animation, audio and lighting; organize asset libraries and replacement workflows for custom game projects.
- Created a 3D-printed product line spanning CAD, 3D scanning, print tuning, packaging and installation documentation.

### Marketing Coordinator and Lead Server

Origin Beer Lab and Center of the Universe Brewing | Ashland, VA | Dec 2021–Jul 2023

- Produced social media, photo and video content; promoted events and led front-of-house shifts.

### Operations Assistant

T&B Equipment / InProduction | Ashland, VA | Jun 2018–Jan 2021

- Supported inventory and event installations; provided desktop and hardware support to staff.

## SELECTED PROJECTS

**Tip Top Pinball | Client website** — Redesigned and launched a service business website using HTML, CSS, JavaScript, GitHub Pages and Web3Forms. Wrote local service-area content, set up its Google Business Profile and maintain the live site monthly.

**Stall Brawl | Original interactive game** — Built eight C# game modes, a player queue for up to 16 players and a two-display Unity interface. Integrated hardware and prioritized audio; created an offline test harness and Python log analyzer. Beta playtested on the Multimorphic P3.

## TECHNICAL SKILLS

**Development:** JavaScript, HTML, CSS, C#, Python, React, Node.js, Astro, Supabase, Unity

**Design and media:** Figma, Photoshop, Illustrator, Premiere Pro, After Effects

**Web and automation:** GitHub Pages, WordPress, Squarespace, Shopify, local SEO, Google Analytics, Apps Script

**Physical prototyping:** Fusion, 3D scanning, Bambu Studio, multi-material 3D printing

## EDUCATION

Advanced Studies Diploma | Atlee High School, Mechanicsville, VA | 2018
